

Product Specifications

# LH-Loadstar

Operation voltage: DC 12V/24V

LED Qty: 72 PCS

LED Power: 1W

Material: PC

IP:IP67

LED lifetime: 100000/h

Warranty: 2 years

Colour: Clear/Red/Blue/amber(Optional)

Operation temperature:-30--+70°C

Installation method: screw fixed mounting bracket

Flash pattern: 33 type

Certificate: ECE R65, ISO, ROHS, IP67 and CE

Product size:1200mm L× 280mm W× 90mm H

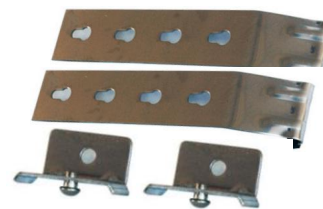

Packing size: 1390mm L× 360mm W× 130mm H

Grow weight(Including lightbar): 9 KG

FOB Price:\$180/piece

KZQ-005

ZJ-010 hook bracket

## Lightbar installation method

Install the lightbar without need to be punched in the vehicle in case of damage the vehicle body.It can be fixed by the hook, the hook fixed the side of the door and fixed the lightbar body.Usually, the siren is mounted in the ashtray position in front of the gearbox. The other is on the plastic plate on the left and right sides of the gearbox.

Install step:

First: put the lightbar on the top of the vehicle, fixed the tripod screw to hole position, aim at the vehicle doorpost.

Second: After adjusting the hook spacing, fix the screws on the hook.

Third: Use a hook and a screw to secure the lightbar. (The tripod does not rebound a little when pushing the light)

Fourth: Loose the lightbar wiring, reference the below picture.

Fifth: After finish the wiring, connect positive and negative pole.
